

E L E V A T I O N C E R T I F I C A T E

The Elevation Certificate is an important administrative tool of the National Flood Insurance Program (NFIP). It is to be used to provide information necessary to ensure compliance with community floodplain management ordinances, to determine the proper insurance premium rate, and to support a request for a Letter of Map Amendment (LOMA) or Letter of Map Revision based on fill (LOMR-F).

As of April 17, 2012 the City of Fond du Lac maintains Elevation Certificates as a matter of public information. The following elevation certificates were submitted for modifications to existing structures and/or the construction of new structures in a flood hazard area.
